DES!GNMIND

ONLINE BUSINESS NETWORKING FOR BUILDING INDUSTRY PROFESSIONALS

DesignMind: On-line networking and collaboration for building industry professionals.

DesignMind is an on-line networking system that links building industry design and specification professionals to clients, suppliers and industry solution, service and information providers.

The system makes it easy for anyone in the industry to create and self manage an on-line profile. Each DesignMind member gets the tools to get, share or source information, opinion and media - as well as the functionality to communicate, network and collaborate with industry stakeholders.

DesignMind is a product of The Virtual Works, leaders in the field of interactive marketing and community management. The technology is free to design and specification professionals thanks to the sponsorship of Plascon, Grohe, Bosun, SmartStone, Glass South Africa, Autodesk, DataBuild and Industry Insight.
